ACHIEVING RESULTS

Senthil Kumar Gopalan

Data Usage Process commonly referred to as the DUR process, migrated from OneTrust platform to MDP(Collibra) platform. This migration will streamline and simplify the review process and make it easier for application owners to share data. Upgrade to EDGE architecture. EDGE is more secure platform and this upgrade will help us in our efforts towards data profiling and classification. Launch of Collibra Harvester module that enables us to ingest Tableau reports Meta Data.
